

一般瓦條施工採風槍釘施工快速，但無法長久及牢固，螺絲鎖定瓦條的安全性為風槍釘的 28 倍以上，一顆螺絲對里和而言即是重大工程

專為 RC 鎖定而設計免加塑膠套不用擔心塑膠套脆化及老化問題  
拉伸速度 0.5mm/min，試驗結果達 187kgf。

**Specially is the RC locking designs exempts adds the reverted set Don't worry a reverted set of embitterment and the aged question Stainless steel RC special-purpose screw and tries the body by 3,000 Pound and 4,000 pound RC after the SGS unit with 20 tons universal testing machines, carries on the screw drag experiment, stretch Speed 0.5mm/min, the test result reaches 187kgf. Proves the stainless Steel RC special-purpose screw force locking function**

不鏽鋼 RC 專用螺絲並以 3000 磅及 4000 磅 RC 試體經 SGS 單位用

20 噸萬能試驗機，進行螺絲拉拔試驗，

**證明不鏽鋼 RC 專用螺絲強力鎖定功能**
